DDS Wireless Garneres Significant Win in Newly Opened Quebec and Launches a Hosted Solution for Transit

Richmond, BC, January 12, 2009 – DDS Wireless International Inc. (TSX: DD) has made an important win in the Quebec taxi market which was only recently opened to in-vehicle taxi dispatch system equipment through regulatory changes. The Company also continues to successfully develop its Transit business with the sale of its first hosted service offering.

Digital Dispatch, the Company's taxi division, has signed a new contract with Taxis de Sherbrooke Inc. in Sherbrooke, Quebec for a Pathfinder dispatch system with 90 Vector 530 mobile data terminals. This represents an important first win in the newly opened Quebec market which, until recently, had regulations prohibiting mobile data terminals in taxis. The Company's Taxi division is actively pursuing this market and expects to sign further contracts in the near future.

Marc Kirouac, the President of Taxis de Sherbrooke said "We chose the Digital Dispatch Pathfinder System combined with the Vector 530 mobile data terminals mainly for its established reputation and capacity for long term customer support. For us, the customer support is a more important criteria than the product itself especially with high-tech dispatch software for the taxi business.

After evaluating several systems for 14 months, the DDS solution was the one that meets all of our needs. Digital Dispatch will provide a French version of Pathfinder for us and that was very important. We are proud that Taxis de Sherbrooke is the first company in the province of Quebec to sign a deal with Digital Dispatch Systems."

StrataGen Systems, the transit business of DDS Wireless, today announced the signing of their first ADEPT™ Hosted customer, Mercy Transportation. Targeted to have their system switched on in February, Mercy will be taking advantage of StrataGen's new fully hosted package, which bundles ADEPT™ software, in vehicle MDT's, wireless data services and all associated equipment into one affordable monthly plan.

"This signals a new era in Paratransit software, opening up accessibility to the world's best demand response solution at a low monthly cost. We're very pleased to welcome Mercy Transportation on board", said Brent Gushulak, StrataGen's Vice President of Sales and Marketing on Monday.

StrataGen has also continued its close relationship with Avail Technologies, with a significant order cementing StrataGen as Avail's transit software and in-vehicle MDT supplier of choice. "Avail is a trusted

partner of StrataGen, with many more exciting projects coming up in the new year", commented Mr Gushulak.

These orders along with other small orders for the Transit Business unit in aggregate exceed one million in total revenue and recurring revenue.

Forward-Looking Statements

This press release contains statements which, to the extent that they are not recitations of historical fact, may constitute forward-looking information. Such forward-looking statements may include financial and other projections as well as statements regarding the Company's future plans, market opportunities, objectives, performance, revenues, growth, profits, operating expenses or the Company's underlying assumptions. Factors that could cause actual events or results to differ materially from those suggested by these forward-looking statements include, but are not limited to: the need to develop, integrate and deploy applications to meet our customer's requirements; the possibility of development or deployment difficulties or delays; the dependence on our customer's satisfaction with DDS Wireless' products; the timing of entering into significant contracts; our customers' continued commitment to the deployment of our solutions; the risks involved in developing integrated software and hardware solutions and integrating them with third-party communication and other services; the performance of the global economy and growth in software industry sales; market acceptance of the company's products and services; customer and industry analyst perception of the company and its technology vision and future prospects; the success of certain business combinations engaged in by the Company or by competitors; political unrest or acts of war; possible disruptive effects of organizational or personnel changes; technological change, new products and standards; risks related to acquisitions and international expansion; reliance on large customers; concentration of sales; international operations and sales; management of growth and expansion; dependence upon key personnel and hiring; reliance on a limited number of suppliers; industry growth; competition; intellectual property; product defects and product liability; currency exchange rate risk; concentration of ownership; and including but not limited to other factors described in DDS Wireless' reports filed on Sedar, including its Annual Information Form and financial report for the year ended December 31, 2007. In drawing a conclusion or making a forecast or projection set out in the forward-looking information, the Company takes into account the following material factors and assumptions in addition to the above factors the Company's ability to execute on its business plan; the acceptance of the Company's products and services by its customers; the timing of execution of outstanding or potential customer contracts by the Company; the sales opportunities available to the Company; the Company's subjective assessment of the likelihood of success of a sales lead or opportunity; the Company's historic ability to generate sales leads or opportunities; and that sales will be completed at or above the Company's estimated margins. This list is not exhaustive of the factors that may affect our forward-looking information. These and other factors should be considered carefully and readers should not place undue reliance on such forward-looking information. All forward-looking statements made in this press release are qualified by this cautionary statement and there can be no assurance that actual results or developments anticipated by the Company will be realized. The Company disclaims any intention or obligation to update or revise forward-looking information, whether as a result of new information, future events or otherwise.

The Toronto Stock Exchange has neither approved nor disapproved the contents of this press release.
