## **DDS Wireless' StrataGen Unit signs 2 contracts totaling \$4.1 Million**

*Deals represent significant expansion of existing customers' systems*

**Richmond, BC, January 13, 2010** – DDS Wireless International Inc. announces today that its Transit business unit, StrataGen Systems Inc., has closed two significant contracts with existing customers with an aggregate value of \$4.1 million.

The larger contract is with MTA New York City Transit (NYCT), a long-time StrataGen customer. Valued at \$3.5 million, the contract is for the addition of Interactive Voice Response (IVR) into the existing StrataGen system installed at the Authority. The Paratransit Division of NYCT currently provides up to 27,000 daily trips through its Access-A-Ride™ service, all of which are managed and scheduled using StrataGen's Adept™ Software. This important system expansion assists in addressing NYCT's stated objectives for the project – "to increase the efficiency of Paratransit operations and customer services, thereby improving service response and customer satisfaction while further reducing revenue vehicle mileage requirements."

"MTA New York City Transit continues to be a leader in Paratransit services in North America", states Matt Scheuing, President of StrataGen Systems Inc. "We are very proud to have New York as a showcase client in North America given the operation's unique requirements coupled with its record trip volumes which exceed any other system. The integration of modules such as IVR demonstrates our Adept™ system's flexibility and underscores StrataGen's expanding capability as a Systems Integrator to clients of significant size."

An additional contract was signed with Broward County Transit to provide an expansion of a previously announced Adept™ systems centralization project. This expansion provides several important add-ons including installation of StrataGen's new Dispatch Alert application, along with implementation of key applications interfaces for potential future deployments of Interactive Voice Response (IVR) and Automatic Vehicle Location & Mobile Data Computer (AVL/MDC) applications.

"We are pleased to partner with Broward on the continued expansion of its Adept™ system. Broward County continues to innovate and we are proud that our Adept™ system is the foundation for expanding both functionality and customer service applications in support of the County's TOPS Paratransit service", states Matt Scheuing, President of StrataGen Systems Inc.

### **About DDS Wireless International Inc.**

DDS Wireless International Inc. is a global leader in providing application software for multiple vertical markets within the transportation industry.
