Digital Dispatch Reinforces Technology Leadership Year-End Results To Be Announced On March 9th

Richmond, BC, February 28, 2005 – Continuing its leadership in technology innovations, Digital Dispatch Systems Inc. (TSX: DD) has enabled two local taxi companies to share dispatch operations by using its PathFinder™ application, communicating over Rogers Wireless Communication Inc.'s GPRS network.

The Chilliwack Taxi & Imperial Limousine company of Chilliwack, B.C., is now sharing Digital Dispatch's PathFinder™ dispatch application with Newton Whalley Hi-Way Taxi Ltd., located about 60 miles away in Surrey, B.C., connecting via a high-speed Internet connection and dispatching over a GPRS network.

"What is unique here is that PathFinder's™ multi-fleet support ability has created a winning situation for both larger and smaller taxi companies," said David Wang, Chief Technology Officer for Digital Dispatch. "This offers larger companies an additional revenue stream by hosting the dispatch application for smaller fleets, while the smaller fleets can leverage the advantages of a highly advanced computerized dispatch system without incurring huge infrastructure costs. This is the first time that we have implemented this dispatch set-up over a common cellular network and we thank both Chilliwack Taxi and Newton Whalley for setting this landmark with us."

"For a 25-vehicle fleet like ours, sharing a dispatch application and communicating over a common cellular network is one of the most cost-effective options," said Paul Johal, General Manager for Chilliwack Taxi. "We needed to operate as efficiently as possible. The fact that PathFinder is capable of linking smaller taxi operations and sharing common data coverage and infrastructure has been a very attractive value proposition for us. We are delighted to be the first taxi company to use this dispatch set-up communicating over a public wireless network."

Digital Dispatch has consistently been the first to introduce new dispatch technology to the market including GPS-based closest vehicle dispatch software, DSP high-speed modems, multi-channel, multi-host and multi-site network gateways, in-vehicle mapping technology and in-vehicle debit card payment.

Year-End Earnings Release

Digital Dispatch will announce its 2005 year-end financial results on Thursday, March 9, 2006, before the opening of the Toronto Stock Exchange. The financial statements and MD&A will also be available on the company's web site at that time. The company will host a conference call at 1:30 PM EST on the same day to discuss the results. Please call 416-695-7848 or 1-877-888-4483 to participate in the call.

###

About Chilliwack Taxi & Imperial Limousine

Chilliwack Taxi is based in Chilliwack, about 60 miles East of Vancouver, B.C., and has been in operation since 1947. This 25-vehicle company is partly owned by owner-operators and they are eager and excited to incorporate this new technology.

About Digital Dispatch Systems Inc.

Digital Dispatch Systems Inc. is a worldwide provider of mobile data solutions for fleet and mobile workforce management. Founded in 1987, we have an installed base of more than 61,000 wireless mobile data devices and 174 wireless data systems in four continents.
