DDS Wireless Appoints Presidents for Transit and Taxi Business Units to Drive Diversified Growth Strategy

Richmond, BC, March 5, 2008 – DDS Wireless International Inc. (TSX: DD), a global leader in providing wireless fleet management solutions to multiple markets worldwide, is pleased to announce the appointments of Mike Nienhuis and Steven Juliver as presidents for its Transit (StrataGen) and Taxi (Digital Dispatch) business units, respectively. These key leadership appointments reinforce the DDS Wireless' strategic diversification plan and its evolution into Transit, Taxi, eFleet Services, and Mobile Devices and Communications (Digital Wireless) market focused business units to drive future growth.

Digital Wireless business unit will be headed by its president George Lipski while Ray Fast will continue to lead the Company's eFleet business unit as its president.

"Mike brings proven leadership and operations management skills which are aligned with our strategic plan for the Transit business," said Vari Ghai, CEO of DDS Wireless. "StrataGen not only complements our existing Transit business but also boasts a customer base that includes four of the top five, and 10 of the top 20 transit authorities in North America. We plan to maintain and increase this momentum under Mike's leadership which is augmented by the strong supporting leadership team of William Ho, CTO, and Brent Gushulak, VP of Sales, for StrataGen," Mr. Ghai added.

Mr. Nienhuis has over 10 years of executive operations and general management experience in high growth, multi-location corporations. His most recent position was the General Manager of Sports and Giving at The Active Network, a provider of technology solutions and marketing services and recognized as one of the 500 fastest growing companies in the U.S.A. In his 14-year tenure in The Active Network, Mr. Nienhuis held several other senior management positions including Vice President of Operations, General Manager of Community Solutions and Vice President of Services. He has a Masters of Business Administration degree from the Simon Fraser University and will be based in Kirkland, Washington.

"As the President of our Taxi business (Digital Dispatch), Steven's expertise in team building, track record of strategic business management and proven ability to capitalize on emerging technologies will be invaluable," Mr. Ghai said. "We already have a successful and long heritage in the Taxi business, a strong management team, and are executing on an aggressive market and product diversification plan. Our recent entry into the small taxi fleet market with a managed dispatch solution acquired through Mobisoft, and the introduction of the Internet-type multimedia passenger information and advertising solution for

the taxi backseat represent aggressive execution of our strategic diversification plan. Steven's strong leadership will leverage our strengths and propel our taxi business to the next level. "

Mr. Juliver joins Digital Dispatch from EOS Technologies Inc., a manufacturer and supplier of electro-optic technology-based sensors, space debris tracking stations, commercial telescopes and remotely-controlled weapons stations to aerospace and defense markets, where he held the position of Executive Vice President. He brings to Digital Dispatch over 25 years of management experience including driving strategic and financial plans, product and business development and operations. He started his career with Motorola Inc. and is a co-founder and former Board Chair of the Southern Arizona Institute of Advanced Technology, and member of the Arizona Governor's Council for Workforce Policy. Mr. Juliver has a Bachelor of Business Administration degree from the University of Montreal and will be based in Digital Dispatch's headquarters in Richmond, British Columbia.

###

About DDS Wireless International Inc.

DDS Wireless International Inc. is a global provider of wireless mobile data solutions to multiple markets using state of the art technologies in real-time dispatching, vehicle location and tracking, as well as computerized routing and scheduling. Its offerings include mobile data computers, fleet management applications, communications infrastructure, project management, long-term customer support as well as multimedia mobile commerce systems for fleets. Previously known as Digital Dispatch Systems Inc. a world leader in providing wireless data dispatch systems to the taxi market for over 20 years, the Company changed its name on March 4, 2008, to re-brand itself after restructuring its operations into four market focused business units to facilitate diversification and growth, as well as effectively integrate the recently acquired businesses of Finland-based Mobisoft OY and Washington-based StrataGen Systems Inc. Forward-Looking Statements

This press release contains statements which, to the extent that they are not recitations of historical fact, may constitute forward-looking information. Such forward-looking statements may include the Company's success in generating future sales and customers in its expansion efforts including but not limited to, financial and other projections as well as statements regarding the Company's future plans, market opportunities, objectives, performance, revenues, growth, profits, operating expenses or the Company's underlying assumptions. Factors that could cause actual events or results to differ materially from those suggested by these forward-looking statements include, but are not limited to: the need to develop, integrate and deploy applications to meet our customer's requirements; the possibility of development or deployment difficulties or delays; the dependence on our customer's satisfaction with DDS Wireless International's products; the timing of entering into significant contracts; our customers' continued commitment to the deployment of our solutions; and including but not limited to other factors described in DDS Wireless International's reports filed on Sedar, including its Annual Information Form and financial report for the year ended December 31, 2006. In drawing a conclusion or making a forecast or projection set out in the forward-looking information, the Company takes into account the following material factors and assumptions in addition to the above factors: the Company's ability to execute on its business plan; the acceptance of the Company's products and services by its customers; the timing of execution of outstanding or potential customer contracts by the Company and the sales opportunities available to the Company; This list is not exhaustive of the factors that may affect our forward-looking information. These and other factors should be considered carefully and readers should not place undue reliance on such forward-looking information. All forward-looking statements made in this press release are qualified by this cautionary statement and there can be no assurance that actual results or developments anticipated by the Company will be realized. The Company disclaims any intention or obligation to update or revise forward-looking information, whether as a result of new information, future events or otherwise.
