DDS Wireless' eFleet Unit Signs Contract with Leading Limousine and Shuttle Service

Richmond, BC, April 6, 2010 – DDS Wireless International Inc.'s business unit, DDS eFleet Services, today announced that it has signed a contract with a leading US based limousine and shuttle service operator valued at more than US\$800,000. This contract represents continued momentum in building DDS's subscriber base and recurring revenues for its eFleet and other hosted fleet management solutions.

eFleet was selected as it provides very comprehensive functionality in the form of an easily deployed turn-key hosted service, for a simple monthly fee per vehicle. By providing digital trip dispatching, text messaging, GPS tracking, GPS navigation, engine monitoring, and in-vehicle wireless Internet access for passengers, the eFleet solution enables significant gains in fleet efficiency, while enhancing customer service.

"We are very proud to welcome this leading limousine and shuttle operator as a client", states Ray Fast, President of DDS eFleet Services. "Given the size and diversity of their operations, the selection of eFleet underscores the flexibility and scalability of our solution. It also reinforces the eFleet strategy of providing an integrated set of leading edge dispatch and fleet management technologies, deployed as a hosted service and offering a compelling value proposition."

About DDS eFleet Services

Catering to commercial fleets such as limousines and work trucks, eFleet extends some of the core functionalities of computerized dispatching to commercial fleet operators without the upfront costs of maintaining an in-house solution. The eFleet solution includes a complete bundle of software, hardware and data networks that are securely accessible via any Internet web browser. The eFleet system integrates computer aided wireless dispatch, GPS fleet tracking, GPS navigation, two-way text messaging, and point-of-sale payment processing into a single hosted system that is available as a subscription service.
