DDS Wireless' StrataGen Unit signs \$900,000 ADEPT™ enhancement contract with MTA New York City Transit

Richmond, BC, April 12, 2010 – DDS Wireless International Inc. announces today that its Transit business unit, StrataGen Systems Inc., has closed a significant contract with MTA New York City Transit (NYCT).

Valued at over \$900,000, the contract provides for additional functionality to the existing StrataGen ADEPT™ Software system allowing New York City Transit to gain greater scheduling efficiency while achieving longer term cost savings from the system. The Paratransit Division of NYCT currently schedules up to 27,000 trips per day through its Access-A-Ride service, all of which are managed and scheduled using StrataGen's ADEPT™ Software. NYCT has been a customer of StrataGen for over seven years, and this contract follows on a contract award from NYCT announced in January for the integration of interactive voice response with StrataGen's ADEPT™ installation.

"MTA New York City Transit, like many other agencies in the country, continues to look for more budgetary efficiencies in the operation of their system. We are pleased to partner with them on continued enhancements and improvements to their system that will yield tangible benefits in efficiency and reductions in their costs to serve", states Matt Scheuing, President of StrataGen Systems Inc.

About StrataGen

Using patented technology and expertise from all levels of the industry, combined with experience gained from installations worldwide, StrataGen Systems is an international leader in the transit industry. StrataGen provides enterprise-wide and service based solutions to transit agencies of all sizes, focusing on Demand Response, ADA (Americans with Disability Act) compliant and Special Needs providers.

Striving to achieve delivery of the best results possible, StrataGen prides itself on responsiveness, commitment and class leading customer service.
