FOR IMMEDIATE RELEASE
April 19, 2010

DDS Wireless and RideCharge Partner to Provide Taxi Fleets with Advanced Booking Solutions

Richmond, BC and Alexandria, VA, April 19, 2010 – DDS Wireless International Inc. (TSX: DD), a world leader in providing wireless data solutions for fleet management for more than 20 years, and RideCharge Inc., makers of Taxi Magic, the leading nationwide electronic taxi booking service, announced today that they have signed a long term deal to provide integrated solutions for taxi fleets.

The two companies have already developed a proprietary interface between the Taxi Magic electronic booking service and DDS' TaxiTrack™. This agreement reinforces the mutual commitment to continue developing enhancements to that interface and adding new capabilities for joint customers, including adding a new interface between Taxi Magic and DDS's PathFinder™ fleet management solution.

The combined solution provides an unprecedented rider experience for automated booking, tracking and payment of their taxi rides. Riders can quickly and easily book a taxi from their mobile phone or PC, track the arrival of the taxi on an electronic map, securely pay for the ride with a registered credit card, and get an electronic receipt for expense reporting. Taxi companies can handle bookings and payments in a much more efficient and less expensive manner than previously, thereby allowing managers and drivers to focus on running their business.

"DDS has always been a technology leader, so we are excited to continue working with an innovative company like RideCharge to bring a fully electronic booking solution to eligible DDS customers around the world," said Vari Ghai, CEO of DDS Wireless.

RideCharge, Inc. President Sanders Partee expanded on Ghai's statement. "DDS is the leading electronic dispatch provider in the United States, which is our first supported geography. Through our partnership with them we will be able to bring Taxi Magic automated booking and payment services to thousands of taxis and millions of consumers. Instead of calling on the phone, waiting on hold, wondering if the taxi is going to show up, and having to pay with cash, taxi customers will be able to conduct the entire process electronically with a few taps on their mobile phone or PC. The next step for RideCharge is to take our solution to DDS customers internationally."

About RideCharge Inc.

RideCharge is the company behind the Taxi Magic brand and set of services. Taxi Magic is the leading electronic taxi booking service in the United States, enabling users to electronically book a ride from any mobile phone or PC with over 40,000 taxis across the country. The private company offers downloadable applications for iPhone, Android, Blackberry, Windows Mobile and Palm smart phones. Users with feature phones can use text booking, and PC users can go to TaxiMagic.com. RideCharge is based in Alexandria, VA.
