Digital Dispatch Introduces the iView 8000™ to Enhance the Passenger Experience

Richmond, BC, May 15, 2007 - Digital Dispatch (TSX: DD), a leading provider of mobile data solutions, is pleased to announce the commercial availability of its iView 8000™ which is designed to enhance the passenger experience in the backseat of the taxicab or limousine.

The iView 8000™ is an integrated, multimedia, and interactive terminal with the capability of providing passengers with a variety of interesting information including street maps which indicate the route being traveled, news, city sights, advertising and much more. The 10.4" interactive monitor mounts simply into the vehicle and the wide viewing angle makes it easy for passengers to view personally selected value-added multimedia content. In addition, it also allows passengers to perform secure payment transactions with a debit or credit card.

"The demand for technology enhancements in taxicabs is rapidly growing throughout the world," stated Cliff Snelling, Vice President of Marketing for Digital Dispatch. "The iView 8000™ clearly demonstrates Digital Dispatch's dedication to providing innovative, high-quality and reliable products to meet these requirements. The iView 8000™ will facilitate potential future incremental revenue streams for Digital Dispatch by providing relevant advertising of immediate interest to our customers' passengers and by enabling payment transactions through this new technology median to complement our core business."

The iView 8000™, which is currently being piloted in New York City, was engineered with a rugged housing and an industrial grade touch screen specially laminated to withstand potential abuse in the passenger compartment.

The iView 8000™ was first created to meet the project guidelines for a New York City initiative to install technology enhancements into its city wide yellow taxicab fleet. This leading innovative product offering will also be offered to all taxicab companies in North America by Digital Dispatch.

###

About Digital Dispatch

Digital Dispatch Systems Inc. is a worldwide provider of mobile data solutions for fleet and mobile workforce management. Founded in 1987, we have an installed base of more than 75,000 wireless mobile data devices and nearly 200 wireless data systems in four continents. We offer products and services to manage vehicle fleets and mobile workforces, including dispatch software, wireless communication infrastructure and a range of in-vehicle mobile devices.

Forward-Looking Statements

This press release contains statements which, to the extent that they are not recitations of historical fact, may constitute forward-looking information. Such forward-looking statements may include financial and other projections as well as statements regarding the Company's future plans, market opportunities, objectives, performance, revenues, growth, profits, operating expenses or the Company's underlying assumptions. Factors that could cause actual events or results to differ materially from those suggested by these forward-looking statements include, but are not limited to: the need to develop, integrate and deploy applications to meet our customer's requirements; the possibility of development or deployment difficulties or delays; the dependence on our customer's satisfaction with Digital Dispatch Systems' products; the timing of entering into significant contracts; our customers' continued commitment to the deployment of our solutions; the risks involved in developing integrated software and hardware solutions and integrating them with third-party communication and other services; the performance of the global economy and growth in software industry sales; market acceptance of the company's products and services; customer and industry analyst perception of the company and its technology vision and future prospects; the success of certain business combinations engaged in by the Company or by competitors; political unrest or acts of war; possible disruptive effects of organizational or personnel changes; technological change, new products and standards; risks related to acquisitions and international expansion; reliance on large customers; concentration of sales; international operations and sales; management of growth and expansion; dependence upon key personnel and hiring; reliance on a limited number of suppliers; industry growth; competition; intellectual property; product defects and product liability; currency exchange rate risk; concentration of ownership; and including but not limited to other factors described in Digital Dispatch Systems' reports filed on Sedar, including its Annual Information Form and financial report for the year ended December 31, 2006. In drawing a conclusion or making a forecast or projection set out in the forward-looking information, the Company takes into account the following material factors and assumptions in addition to the above factors the Company's ability to execute on its business plan; the acceptance of the Company's products and services by its customers; the timing of execution of outstanding or potential customer contracts by the Company; the sales opportunities available to the Company; the Company's subjective assessment of the likelihood of success of a sales lead or opportunity; the Company's historic ability to generate sales leads or opportunities; and that sales will be completed at or above the Company's estimated margins. This list is not exhaustive of the factors that may affect our forward-looking information. These and other factors should be considered carefully and readers should not place undue reliance on such forward-looking information. All forward-looking statements made in this press release are qualified by this cautionary statement and there can be no assurance that actual results or developments anticipated by the Company will be realized. The Company disclaims any intention or obligation to update or revise forward-looking information, whether as a result of new information, future events or otherwise.
