## Local Service Companies Turn To Digital Dispatch's Hosted Service

**Richmond, BC, June 8th, 2006** – Several local service companies have recently turned to Digital Dispatch Systems Inc.'s (TSX: DD) eFleet™ service boosting the Company's business diversification strategy and recurring revenue model. eFleet™ is Digital Dispatch's Web-based hosted services that includes wireless dispatch, automatic vehicle location (AVL), and mapping application supported by standard Web-enabled hand-held devices or the Company's mobile data terminals.

"eFleet is designed to offer small service companies the operational efficiencies of GPS-based real-time automatic vehicle location and basic dispatch activities with minimum or no upfront set-up costs," said Kerry Brock, the newly appointed Director of Sales for eFleet™ for Digital Dispatch. "We have used our years of dispatch expertise to develop a service-based dispatch model that is just right for small service companies and it is indeed rewarding to see local companies now turning to this."

Aimed at managing smaller fleets of mobile assets, eFleet™ is a subscription-based, hosted, no-frill dispatch service. Companies can monitor their assets in real-time using GPS technology. Local service companies at various stages of implementing eFleet™ include Genesis, Nowak, Hiway Refrigeration, Dundee and Fife and Target among others. Eagle West Truck and Crane of Abbotsford and Vimac Transportation Ltd. of Richmond have been customers of eFleet™ for sometime now.
