## DDS Wireless Reports New Sales from Multiple Markets

**Richmond, BC, June 23, 2008** – DDS Wireless International Inc.'s (TSX: DD) recent restructuring into Transit, Taxi, Limousines and Work Truck, and Wireless Devices and Communication-focused businesses has given the Company new momentum in these markets with all four making landmark progress.

DDS Wireless' Transit business, StrataGen Systems, received the Notice to Proceed from Access Services Inc. (ASI) of Los Angeles, California, for its previously announced \$3.32 million contract for demand-response management services to integrate StrataGen's ADEPT™ software with voice recognition software from Unified Dispatch LLC of Altadena, California. This validates its stature as one of the premier demand response solution providers for the Transit market.

The Company's Taxi operation, Digital Dispatch gained several new customers in its down market move with its recently launched TaxiBook™ bundled dispatch subscription service for small taxi fleets. TaxiBook™ now has 9 customers including 7 new contracts won in just the last four months. Total revenues from these multi-year subscriptions are over \$1 million. One of Digital Dispatch's largest existing customers, TAXIS G7 of Paris, France, also continues with its previously announced fleet expansion and upgrade project by placing another order for several hundred more iPilot 8000™ mobile computers worth \$1.8 million in total.

In the Limousine and Work Truck market, DDS eFleet Services and Livery Coach Software, LLC have successfully deployed their first integrated limousine fleet management solution to Torrie Pines Transportation of San Diego, California. This integrated system extends the functionality of Livery Coach's applications software for operations management by adding eFleet automated job dispatching to chauffeurs via in-vehicle mobile data terminals, real-time job/status feedback from chauffeurs, automatic GPS navigation, GPS fleet tracking, two-way text messaging, and in-vehicle credit card processing. Livery Coach's applications software is estimated to be used by nearly 3,000 limousines at different limousine companies which now become a potential market for this new integrated solution.

The Wireless Devices and Communications business of DDS Wireless, Digital Wireless is gaining momentum as an Original Equipment Manufacturer. New Zealand-based Steelcom Electronics Ltd., a communications solutions provider for local public safety markets, has placed an initial order for 130 iPilot 8000™ mobile computers with the potential to expand to all 4,000 vehicles of its fire and ambulance

clients. Digital Wireless has commenced delivery of its mobile data terminals to South Africa-based Emcom SA (Pty) Ltd. and also won a new order for iPilot 8000s from AAA Oregon/Idaho Auto Club.

#### **Forward-Looking Statements**

This press release contains statements which, to the extent that they are not recitations of historical fact, may constitute forward-looking information. Such forward-looking statements may include the Company's success in generating future sales and customers in its expansion efforts including but not limited to, financial and other projections as well as statements regarding the Company's future plans, market opportunities, objectives, performance, revenues, growth, profits, operating expenses or the Company's underlying assumptions. Factors that could cause actual events or results to differ materially from those suggested by these forward-looking statements include, but are not limited to: the need to develop, integrate and deploy applications to meet our customer's requirements; the possibility of development or deployment difficulties or delays; the dependence on our customer's satisfaction with DDS Wireless International's products; the timing of entering into significant contracts; our customers' continued commitment to the deployment of our solutions; and including but not limited to other factors described in DDS Wireless International's reports filed on Sedar, including its Annual Information Form and financial report for the year ended December 31, 2007. In drawing a conclusion or making a forecast or projection set out in the forward-looking information, the Company takes into account the following material factors and assumptions in addition to the above factors: the Company's ability to execute on its business plan; the acceptance of the Company's products and services by its customers; the timing of execution of outstanding or potential customer contracts by the Company and the sales opportunities available to the Company; This list is not exhaustive of the factors that may affect our forward-looking information. These and other factors should be considered carefully and readers should not place undue reliance on such forward-looking information. All forward-looking statements made in this press release are qualified by this cautionary statement and there can be no assurance that actual results or developments anticipated by the Company will be realized. The Company disclaims any intention or obligation to update or revise forward-looking information, whether as a result of new information, future events or otherwise.
