## **DDS Wireless' StrataGen Unit signs \$950,000 contract**

*Deal provides a new service offering for MTA New York City Transit*

**Richmond, BC, June 2, 2010** – DDS Wireless International Inc. announces today that its Transit business unit, StrataGen Systems, has closed a significant contract with its existing customer, MTA New York City Transit (NYCT).

The contract with NYCT is for the development of an Intermodal Trip Planning application (ITP), with a starting value of \$950,000. The ITP application will provide NYCT's Paratransit division the ability to integrate the transportation options for riders using a combination of Paratransit services and current fixed route systems. It is anticipated that the ITP application will provide NYCT with greater operational flexibility and efficiencies going forward. The Paratransit Division of New York City Transit (NYCT) currently provides up to 27,000 daily trips through its Access-A-Ride™ service, all of which are managed and scheduled using StrataGen's ADEPT™ Software. This module will enhance current services provided in a very cost effective manner.

"We are very excited to work with MTA New York City Transit on this application as it enables convergence of fixed and demand response modes of public transportation", states Matt Scheuing, President of StrataGen Systems Inc. "We look forward to supporting NYCT in delivering both customer service and service efficiency in its Paratransit operations."

### **About DDS Wireless International Inc.**

DDS Wireless International Inc. is a global leader in providing application software for multiple vertical markets within the transportation industry.
